SG72A

SGB100 Bluetooth Communication Module is wireless communication module designed for SmartGen genset controllers, which can monitor and adjust configuration parameters of controllers via iGMPA6 mobile phone software.

Product Code：6120007
Case Dimensions：51.3* 36.1* 17.6(mm)
Operating Temp. ：(-25~+70)℃
Weight：0.04kg

COMPLETE DESCRIPTION

1 OVERVIEW

SGB100 Bluetooth Communication Module is wireless communication module designed for

SmartGen genset controllers, which can monitor and adjust configuration parameters of controllers via iGMPA6 mobile phone software.

2 PERFORMANCE AND CHARACTERISTICS

1) It is reliable with Bluetooth 4.1 and BLE low power consumption communication mode.
2) Small and light, easy to take.
3) Configuration work is finished on the mobile client instead of computer used before. More convenient and reduced requirement for the working platform.
